X10 is a protocol for communication among electronic devices used for home automation (domotics). It primarily uses power line wiring for signaling and control, where the signals involve brief radio frequency bursts representing digital information. A wireless radio based protocol transport is also defined.. X10 was

developed in 1975 by Pico Electronics of Glenrothes, Scotland, in order to ...

1. Introduction. Recent advances in communications and information technology (IT), and the rise of digital content and social media in particular, are transforming the ways in which individuals and businesses search for information and interact with one another (Dennis et al., 2009, Greenberg, 2010, Kietzmann et al., 2011). A fundamental shift in the B2B sector involves the growing influence ...
