

advances in image and pdf

ONLINE COVER Real-time processing and manipulation of biological signals requires bioelectronic devices with integrated components capable of signal amplification, processing, and stimulation; Transistors form the backbone of such circuits. As represented on the March cover, Spyropoulos et al. have introduced an internal-ion gated organic electrochemical transistor (IGT) that uses contained ...

ImageNet: A Large-Scale Hierarchical Image Database

Abstract. Contemporary, layer-wise additive manufacturing approaches afford sluggish object fabrication rates and often yield parts with ridged surfaces; in contrast, continuous stereolithographic printing overcomes the layer-wise operation of conventional devices, greatly increasing achievable print speeds and generating objects with smooth surfaces.

Rapid, continuous additive manufacturing by volumetric

Aims and Scope: The "Advances in Computational Design (ACD), An international Journal," aims at providing an excellent publication channel for researchers and practicing engineers in computational design in all the areas of engineering & science. The journal focuses on but not limited to the following areas : Computer-Aided Design in Engineering, Computer Graphics and Modeling ...

Large Scale Visual Recognition Challenge (ILSVRC) - ImageNet

Cloud computing makes computer system resources, especially storage and computing power, available on demand without direct active management by the user. The term is generally used to describe data centers available to many users over the Internet. Large clouds, predominant today, often have functions distributed over multiple locations from central servers.
