Numerical methods John D. Fenton a pair of modules, Goal Seek and Solver, which obviate the need for much programming and computations. Goal Seek, is easy to use, but it is limited â€" with it one can solve a single equation, however complicated or however many spreadsheet cells are involved, whether the equation is linear or nonlinear.

Introduction. The sampling distribution of a statistic is the distribution of that statistic, considered as a random variable, when derived from a random sample of size .It may be considered as the distribution of the statistic for all possible samples from the same population of a given sample size. The sampling distribution depends on the underlying distribution of the population, the ...
