IMPLEMENTATION MANUAL " WHO SURGICAL SAFETY CHECKLIST (FIRST EDITION) 2

INTRODUCTION The Safe Surgery Saves Lives initiative was established by the World Alliance for Patient Safety as part of the World Health Organization's efforts

WORLD ALLIANCE FOR PATIENT SAFETY IMPLEMENTATION MANUAL

Anesthesia or anaesthesia (from Greek "without sensation") is a state of controlled, temporary loss of sensation or awareness that is induced for medical purposes. It may include analgesia (relief from or prevention of pain), paralysis (muscle relaxation), amnesia (loss of memory), or unconsciousness. A patient under the effects of anesthetic drugs is referred to as being anesthetized.

Spinal anaesthesia (or spinal anesthesia), also called spinal block, subarachnoid block, intradural block and intrathecal block, is a form of neuraxial regional anaesthesia involving the injection of a local anaesthetic or opioid into the subarachnoid space, generally through a fine needle, usually 9 cm (3.5 in) long. It is a safe and effective form of anesthesia performed by nurse anesthetists ...
