Diesel engine generator governors are sometimes referred to as the speed controller for the diesel engine. The diesel engine must maintain a pre-determined speed to maintain generator output specifications.

### **Diesel Engine Generator Governors**

Engine Control. The control of a diesel engine is accomplished through several components: the camshaft,

the fuel injector, and the governor. The camshaft provides the timing needed to properly inject the fuel, the fuel injector provides the component that meters and injects the fuel, and the governor regulates the amount of fuel that the injector is to inject.
