Elementary Crystallography: An Introduction to the

book "Crystallography and its applications." I also thank my students whose interest in the subject and interactions within and outside the class room gave me the idea to undertake this venture. If the content and presentation of this book satisfy their inquisitiveness, I would consider this venture as successful.

SpringerSeriesin - Concordia University

The present article features the concept of the Factor Group, which has its roots in group theory and crystallography, and is essential in the analysis of vibrational spectra of solids. A unified exposition of many concepts related to the factor group is given.

Factor groups, point groups, space groups - SpringerLink

His best known publication is the first edition of Crystallography Made Crystal Clear, which received very complimentary reviews in several journals. He has also published three book chapters, three book reviews, and about 30 articles on diverse subjects, including research articles in biochemistry, and articles on chemistry, science, and interdisciplinary education.

Crystallography Made Crystal Clear - 1st Edition

Martin Julian Buerger (April 8, 1903 – February 26, 1986) was an American crystallographer. He was a Professor of Mineralogy at the Massachusetts Institute of Technology. He invented the X-ray precession camera for studies in crystallography. Buerger authored twelve textbooks/monographs and over 200 technical articles.
