In computer science, functional programming is a programming paradigmâ€"a style of building the structure and elements of computer programsâ€"that treats computation as the evaluation of mathematical functions and avoids changing-state and mutable data. It is a declarative programming paradigm, which means programming is done with expressions or declarations instead of statements.

Become a Programmer, Motherfucker. If you don't know how to code, then you can learn even if you think you can't. Thousands of people have learned programming from these fine books:

Become a Programmer, Motherfucker

We're writing this book because many have found learning Haskell to be difficult and it doesn't have to be. Learning Haskell from the ground up is easier and works better - for both experienced hackers and people new to programming. The language is different enough from any you might've already tried that building up from the foundations will be less difficult and more enjoyable.
