In economics and accounting, the cost of capital is the cost of a company's funds (both debt and equity), or, from an investor's point of view "the required rate of return on a portfolio company's existing securities". It is used to evaluate new projects of a company. It is the minimum return that investors expect for providing capital to the company, thus setting a benchmark that a new ...

The weighted average cost of capital (WACC) is the rate that a company is expected to pay on average to all its security holders to finance its assets. The WACC is commonly referred to as the firm's cost of capital. Importantly, it is dictated by the external market and not by management. The WACC represents the minimum return that a company must earn on an existing asset base to satisfy its ...

What is the cost of capital? The cost of capital is the weighted-average, after-tax cost of a corporation's long-term debt, preferred stock, and the stockholders' equity associated with common stock. The cost of capital is a percentage and it is often used to compute the net present value of the cash flows in a proposed investment. It is also considered to be the minimum after-tax internal rate ...
