The first step in solving a quantum chemical problem is usually solving the Schrödinger equation (or Dirac equation in relativistic quantum chemistry) with the electronic molecular Hamiltonian. This is called determining the electronic structure of the molecule.

Quantum chemistry - Wikipedia

The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...

A discussion main models on the spontaneous origin of life that aims to show how cellular complexity could have gradually emerged from simple systems " in contrast to the sudden appearance of complexity that creationists claim to have been necessary at the beginning of life. Central issues like the composition of the early atmosphere of the Earth and the origin of the homochirality of amino ...
