On Chip Communication Architectures - Sharif

New on-chip communication architectures have been designed to support all inter-component communication in a SoC design. These communication architecture fabrics have a critical impact on the power consumption, performance, cost and design cycle time of modern SoC designs.

On-Chip Communication Architectures, Volume - - 1st Edition

On-Chip verbal exchange Architectures is a complete reference on suggestions, study and developments in on-chip conversation structure layout. it's going to supply readers with a complete survey, now not on hand somewhere else, of all present criteria for on-chip communique architectures.

New PDF release: On-chip communication architectures

Proposed System On Chip explores On chip Communication architectures features to efficiently implement the application. The SoC offers scalability and guarantees on the timing behavior when communicating data between various ... used for the images, pdf file formats, any other types of documents. For every image there will be a header and ...

AN AREA AND POWER EFFICIENT ON CHIP COMMUNICATION

In addition to quantitatively reinforcing the view that on-chip communication is an important target for

system-level power optimization, our work demonstrates (i) the importance of considering the communication architecture in its entirety, and (ii) the opportunities that exist for power reduction through careful communication architecture design.
