operating at peak efficiency pdf

The annual fuel utilization efficiency (AFUE; pronounced 'A'-'Few' or 'A'-'F'-'U'-'E') is a thermal efficiency measure of space-heating furnaces and boilers. The AFUE differs from the true 'thermal efficiency' in that it is not a steady-state, peak measure of conversion efficiency, but instead attempts to represent the actual, season-long, average efficiency of that piece of equipment ...

CEE is the US and Canadian consortium of gas and electric efficiency program administrators. We work together to accelerate the development and availability of energy efficient products and services for lasting public benefit.

CEE – Consortium for Energy Efficiency | Working together

The efficiency of an entity (a device, component, or system) in electronics and electrical engineering is defined as useful power output divided by the total electrical power consumed (a fractional expression), typically denoted by the Greek small letter eta (η). = If energy output and input are expressed in the same units, efficiency is a dimensionless number.
