DAD-IS is the Domestic Animal Diversity Information System maintained and developed by FAO. It provides you with access to searchable databases of breed-related information and photos and links to other online resources on livestock diversity.

### **Domestic Animal Diversity Information System (DAD-IS)**

The domestication of animals is the mutual relationship between animals with the humans who have influence on their care and reproduction. Charles Darwin recognized the small number of traits that made domestic species different from their wild ancestors. He was also the first to recognize the difference between conscious selective breeding in which humans directly select for desirable traits ...

The domestication of animals began with the wolf (*Canis lupus*) at least 15,000 years before present (YBP), which then led to a rapid shift in the evolution, ecology, and demography of both humans and numerous species of animals and plants. The sudden appearance of the domestic dog (*Canis lupus familiaris*) in the archaeological record was followed by livestock and crop domestication, as well as ...
