phase diagrams and heterogeneous pdf

- A mixture is heterogeneous (more than one phase present) - A solution is a single homogeneous phase of variable composition. A two-phase mixture is present in the system (i.e., syrup + sugar) ... Phase diagrams provides us with information needed for the control of phase and microstructure in the materials we make

nized that phase diagrams represent equilibrium conditions for an alloy, which means that very slow heating and cooling rates are used to generate data for their construction. The equilibrium states that are represented on phase diagrams are known as heterogeneous equilibria, because they refer to the coexistence of different states of mat-
