Radiotherapy is used as an alternative to surgery, and is also used after surgery to destroy any residual cancerous tissue. Around 40% of cancer cures are achieved using radiotherapy, compared with 50% using surgery and 10% using chemotherapy. Radiotherapy was developed on the back of particle physics technology.

Physics was known as natural philosophy until the late 18th century. By the 19th century, physics was
realised as a discipline distinct from philosophy and the other sciences. Physics, as with the rest of science,
relies on philosophy of science and its "scientific method" to advance our knowledge of the physical world.
