Evidence synthesis is a joint programme of work by the Royal Society and the Academy of Medical Sciences. "Evidence synthesis" refers to the process of bringing together information from a range of sources and disciplines to inform debates and decisions on specific issues.

### **Evidence Synthesis | Royal Society**

Evidence, broadly construed, is anything presented in support of an assertion. This support may be strong or weak. The strongest type of evidence is that which provides direct proof of the truth of an assertion. At the other extreme is evidence that is merely consistent with an assertion but does not rule out other, contradictory assertions, as in circumstantial evidence.

Numerous studies, ably surveyed by Karabegovic et. al. (2004), have found that high marginal tax rates reduce people's willingness to work up to their potential, to take entrepreneurial risks, and to create and expand a new business: "The evidence from economic research indicates that high and increasing marginal taxes have serious negative consequences on economic growth, labor supply ...
