Racket languages can have the same parenthetical syntax as Racket but with a different semantics; the same semantics but a different syntax; or different syntax and semantics. Thus every Racket program begins with #lang followed by the name of some language: by default, it's Racket (written as racket).

Programming Languages: Application and Interpretation

Description: Great book to learn data structure and algorithm in Java programming language. Filled with a lot of samples but non-trivial examples of implementing different data structures e.g. stack, queue, linked list in Java. Since data structure and algorithm are very important for any Java programmer and quite a common

topic in Java interview, it is an absolute must to have a strong command in both.
