

pull of the moon pdf

Earth tide (also known as solid Earth tide, crustal tide, body tide, bodily tide or land tide) is the displacement of the solid earth's surface caused by the gravity of the Moon and Sun. Its main component has meter-level amplitude at periods of about 12 hours and longer. The largest body tide constituents are semi-diurnal, but there are also significant diurnal, semi-annual, and fortnightly ...

Earth tide - Wikipedia

"King tide" is a colloquial term for an especially high spring tide, such as a perigean spring tide. "King tide" is not a scientific term, nor is it used in a scientific context. The use of the term "king tide" originated in Australia, New Zealand and other Pacific nations to refer to an especially high tide that occurs only a few times per year. The term has now come to be used in North ...
