Responsive web design (RWD) is an approach to web design that makes web pages render well on a variety of devices and window or screen sizes. Recent work also considers the viewer proximity as part of the viewing context as an extension for RWD. Content, design and performance are necessary across all devices to ensure usability and satisfaction.

"I think the world of Web development is becoming easier and easier but it's also making it harder for guys like me to find work because so many people want to use out-of-the-box responsive layout sites that are easy to implement and launch. I personally would much rather make a site from scratch than use a template.
