

the nervous system introduction pdf

The nervous system of vertebrates (including humans) is divided into the central nervous system (CNS) and the peripheral nervous system (PNS).. The (CNS) is the major division, and consists of the brain and the spinal cord. The spinal canal contains the spinal cord, while the cranial cavity contains the brain. The CNS is enclosed and protected by the meninges, a three-layered system of ...

Nervous system - Wikipedia

The peripheral nervous system (PNS) is one of two components that make up the nervous system of bilateral animals, with the other part being the central nervous system (CNS). The PNS consists of the nerves and ganglia outside the brain and spinal cord. The main function of the PNS is to connect the CNS to the limbs and organs, essentially serving as a relay between the brain and spinal cord ...

Peripheral nervous system - Wikipedia

Components of the Nervous System 45 peripheral part includes the nerves through which the central nervous system interacts with the rest of the body. "Nerve" is a familiar word and is used in various ways in ordin-

CNS lymphoma consists of 2 major subtypes: secondary CNS involvement by systemic lymphoma and PCNSL. Contrast-enhanced MR imaging is the method of choice for detecting CNS lymphoma. In leptomenigeal CNS lymphoma, representing two-thirds of secondary CNS lymphomas, imaging typically shows leptomenigeal, subependymal, dural, or cranial nerve enhancement.

Central Nervous System Lymphoma: Characteristic Findings

Some research suggests that practicing meditation may reduce blood pressure, symptoms of irritable bowel syndrome, anxiety and depression, and insomnia.
