window was wide open. Through it came the birds, hitting first the ceiling and the walls, then swerving in mid-flight and turning to the children in their beds. "It's all right, I'm here," shouted Nat, and the children flung themselves, screaming, upon him, while in the darkness the birds rose and dived, and came for him again.

our nation's birds. Every U.S. habitat harbors birds in need of conservation. Hawaiian birds and ocean birds appear most at risk, with populations in danger of collapse if immediate conservation measures are not implemented. Bird populations in grassland and aridland habitats show the most rapid declines over the past 40 years.

Feeding Birds While much has been learned about bird nutrition in recent years, the exact nutritional requirements for parrots are unknown. A majority of birds kept as pets are suffering from some degrees of nutritional deficiency. All-seed diets do not provide the necessary vitamins and minerals most birds need, especially the larger parrots.

common breeding birds that are found primarily in upland habitats. Most of these sounds were recorded in Ohio, and each species includes songs and calls that are most typically heard. Habitat can be a clue to a bird's identity, and many birders also use mnemonics "memory devices" to help learn and remember songs. Refer to the
