In demographics, the world population is the total number of humans currently living, and was estimated to have reached 7.7 billion people as of November 2018. It took over 200,000 years of human history for the world's population to reach 1 billion; and only 200 years more to reach 7 billion.. World population has experienced continuous growth since the end of the Great Famine of 1315-17 ...

14th Annual Demographia International Housing Affordability Survey (2017: 3rd Quarter) B We agree. Apart from the median multiple being simple and useful, it is also the only measure out there for purposes of international comparison.

Demographia International Housing Affordability Survey: 2018

World energy consumption is the total energy used by the entire human civilization. Typically measured per year, it involves all energy harnessed from every energy source applied towards humanity's endeavours across every single industrial and technological sector, across every country. It does not include energy from food, and the extent to which direct biomass burning has been accounted for ...
