Environmental problems of vibrations induced by railway

Traffic-induced vibrations have a great impact on residents located in their reach. Moreover, traffic induces noise, which may also be a nuisance for the inhabitants.

Traffic-induced vibrations. The impact on buildings and people

Abstract. In this paper, a general review is made on the problems of vibrations of the ground and nearby buildings induced by railway traffic, and on the researches on this subject in theoretical analyses, numerical simulations, and field experiments.

vibration complaints, and with measures to mitigate the impact of traffic-induced vibration. The paper describes sources of traffic-induced vibration, identifies possible causes that may result in vibration concerns, and outlines procedures for estimating vibration levels caused by highway traffic.
